PROFESSIONAL SUMMARY

Full-Stack Software Engineer and AI Engineer with hands-on experience developing scalable web applications and AI-powered solutions using Python, FastAPI, React, Next.js, TypeScript, and PostgreSQL. Skilled in designing RESTful APIs, building responsive user interfaces, and integrating LLMs(Claude, Gemini, Groq), Retrieval-Augmented Generation (RAG), and MCP-based AI workflows. Experienced in developing end-to-end applications, implementing structured AI pipelines with LangGraph and Pydantic, and delivering secure, maintainable software solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL.

Frontend Engineering: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS.

Backend Engineering: FastAPI, Node.js, Express.js, REST API Design, Third-Party API Integration.

Databases: PostgreSQL, MySQL, Supabase, Schema Design.

Tools: Git, GitHub, Pull Requests, Code Reviews, Swagger/OpenAPI, Postman, Docker, CI/CD.

Computer Science: Algorithms, Data Structures, Object-Oriented Design, System Design.

AI/LLM Integrations: LangChain, LangGraph, Prompt Engineering, Pydantic, RAG, MCP, Anthropic Claude, Groq, Google Gemini SDK.

PROFESSIONAL EXPERIENCE

Fifth AI Solutions - AI Engineer Intern **Jan 2026 - Present**

React.js, Next.js, TypeScript, Python, FastAPI, PostgreSQL, Claude LLM APIs, RAG, MCP, Docker

- Built full-stack AI learning platform (React/Next.js, FastAPI, PostgreSQL) unifying enrollment, course delivery, assessments, progress tracking, and certification workflows.
- Built secure FastAPI REST APIs for authentication, enrollment transactions, and payment verification, backed by relational PostgreSQL schemas for students, courses, and assessment results.
- Shipped responsive Next.js/TypeScript interfaces with interactive assessments and real-time progress dashboards, using SSR and code splitting for fast, reliable loads.
- Integrated conversational AI tutor (Claude LLM API) for contextual Q&A and personalized recommendations, escalating low-confidence answers to human instructors.
- Engineered RAG pipelines for document chunking, vector embeddings, semantic retrieval, grounded generation over academy resources, with an eval harness scoring answer faithfulness.
- Exposed MCP-compatible endpoints letting external AI assistants query authenticated academy services; containerized with Docker and deployed via CI/CD with API health monitoring.

PROJECTS

ResumeMatch | Python, FastAPI, LangGraph, Pydantic, Next.js, TypeScript, Groq, Supabase **Oct 2026**

- Architected full-stack AI platform automating resume-to-job-description analysis, delivering structured compatibility insights, skill-gap detection, and personalized recommendations.
- Designed multi-step LangGraph workflow for resume parsing, job requirement extraction, skills matching, deterministic fit scoring, and recommendation generation.
- Implemented structured LLM pipelines using Pydantic schemas and Groq-hosted models to convert unstructured resume and job description text into validated, consistent outputs.

- Developed asynchronous FastAPI endpoints for secure resume upload, workflow orchestration, and result retrieval; built PDF ingestion pipeline to normalize documents for AI processing.
- Built responsive Next.js/TypeScript frontend with match-score visualization and missing-skills analysis; integrated Supabase Authentication, private storage, and PostgreSQL for secure, user-scoped persistence of analysis history.

CalmSpace | Gemini 2.5 Flash, Gen AI SDK, React, TypeScript, Node.js, Express.js, Tailwind CSS **June 2026 - Aug 2026**

- Shipped full-stack AI wellness platform using Gemini 2.5 Flash to generate personalized anxiety-relief guidance from user-reported symptoms.
- Built schema-constrained LLM pipeline with Gen AI SDK, enforcing JSON-schema outputs for reliable affirmations, grounding steps, and visualizations.
- Developed resilient Node.js/Express inference APIs with context-aware prompting plus a deterministic fallback engine for uninterrupted access during outages.
- Created responsive React/TypeScript UI with SOS flows, animated breathing exercises, and mood tracking via Web Audio, speech synthesis, and local persistence.

EDUCATION

New Jersey Institute of Technology - M.S. in Computer Science **Jan 2024 – Dec 2025**

● **Coursework** - Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Software Engineering, Computer Networks, Database Systems, Data Analytics, UX Design.
